

aWISH Data Platform (UBITECH)

aWISH
ANIMAL WELFARE INDICATORS AT
THE SLAUGHTERHOUSE

What is the aWISH Data Platform?

The aWISH Data Platform is a secure, centralised system that enables organisations to upload, manage and analyse animal welfare data collected at slaughterhouses. Access is controlled through data-sharing agreements, ensuring that users can only access authorised resources.

What is the aWISH Data Platform?

Organisations register on the platform and receive role-based access upon approval. Data is structured using Dataset Blueprints, uploaded to the platform, and transformed into visualisations and dashboards. Access to datasets, visualisations and dashboards is managed through a Policy Editor, with permissions assigned according to user roles and organisational policies.

Key Functionalities:

- **Dataset Management:** Create, upload and manage datasets and metadata
- **Visualizations:** View and manage data visualisations
- **Dashboards:** Create dashboards and set a preferred homepage view
- **Best Practice Guides:** Access welfare improvement guidance linked to data insights
- **Partners Information:** View information on pilot partners
- **Policy Editor:** Configure permissions and access rules for datasets, visualisations and dashboards
- **Profile & Group Management:** Manage profiles, organisations, users and invitations
- **Notifications:** Receive configurable in-app and email notifications
- **Multi-language Support:** Available in 8 languages
